# MOST Seminar

17.12.2024

Myself

WP2

- Irene Hofmann
- from/currently in Austria
- started End Janurary 2024

First PhD year…trying out different ideas on pedestrian route choices & decision making
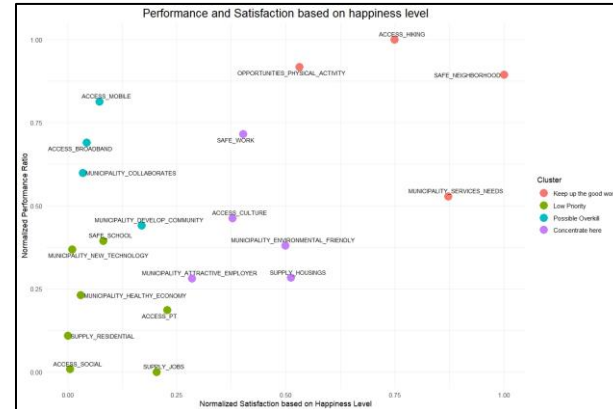

Different methods

VR for SP

On-street interviews

Different data sources & focuses

Mapmatching for GPS-Data

Analysing Citizen survey for Skaun

Second PhD year...**decide and act**

- Pedestrian route choice and trip generation:
    - Finishing pedestrian route choice analysis
        - For Urban environment
            - Trips Home based and return
            - Different persongroups
            - How much is unreased?
        - For „Unurban" environment
    - How does urban area, car ownership and active mobility plays a role in trip generation?
    - → maybe try a simulation with the results

- Decision making tool Skaun
    - Backcasting-tool? What does it need to be 2040 emissions-free?
    - How effective are mesures for Skaun – in comparision to prediction vs actual?
    - How much plays the attitude towards car and other transport systems a role in car in/dependant environments?
