

# Simulation and Autonomy for a Sustainable Mobility Future

Florian Wintel

M  ST

 NTNU

**Miljøpakken**  
- åpner nye muligheter

**Trøndelag fylkeskommune**  
Trööndelagen fylhkentjelle

**TRONDHEIM KOMMUNE**  
Tråanten tjelle

**Statens vegvesen**

Florian Wintel  
PhD candidate since January 2023

Department of Computer Science  
Faculty of Information Technology and Electrical Engineering

Supervision by Dr. Frank Lindseth,  
Dr. Gabriel Kiss and Dr. Adil Rasheed

M.Sc. in Computer Science, Thesis in **Computer Vision** and  
**Deep Learning** for quality assurance in vehicle production

Ph.D. candidate in **Simulation** and **Autonomy**

# Why Autonomous Driving?

EFFICIENT  
RESOURCE  
USAGE

IMPROVED ROAD  
SAFETY

LOWER CARBON  
EMISSIONS

INCREASED  
ACCESSIBILITY

# Where are we now?

L1: Driver Assistance

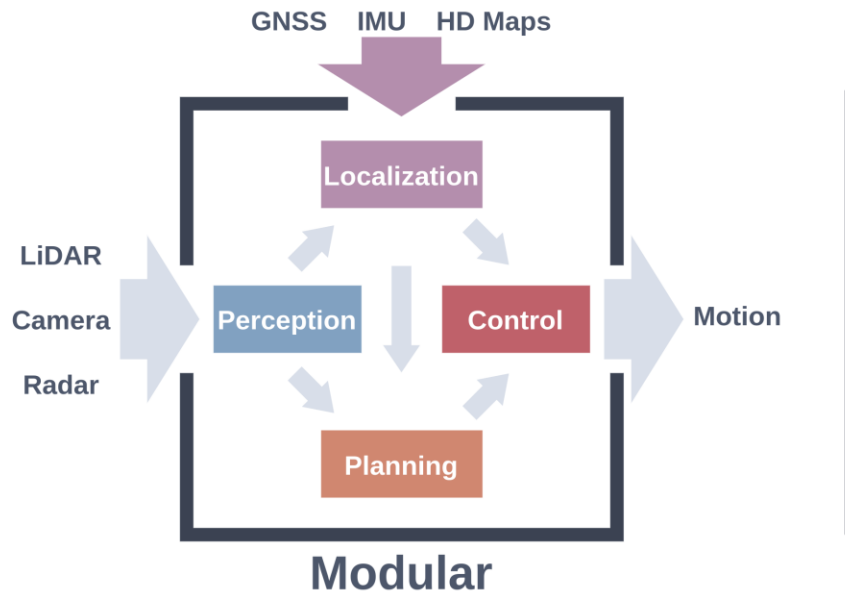

L2: Partial Automation

L3: Conditional Automation

L4: High Automation

L5: Full Automation

# Learning to Drive

# Simulation in CARLA

Quick data generation  
for machine learning

Cost-effective and  
scalable training

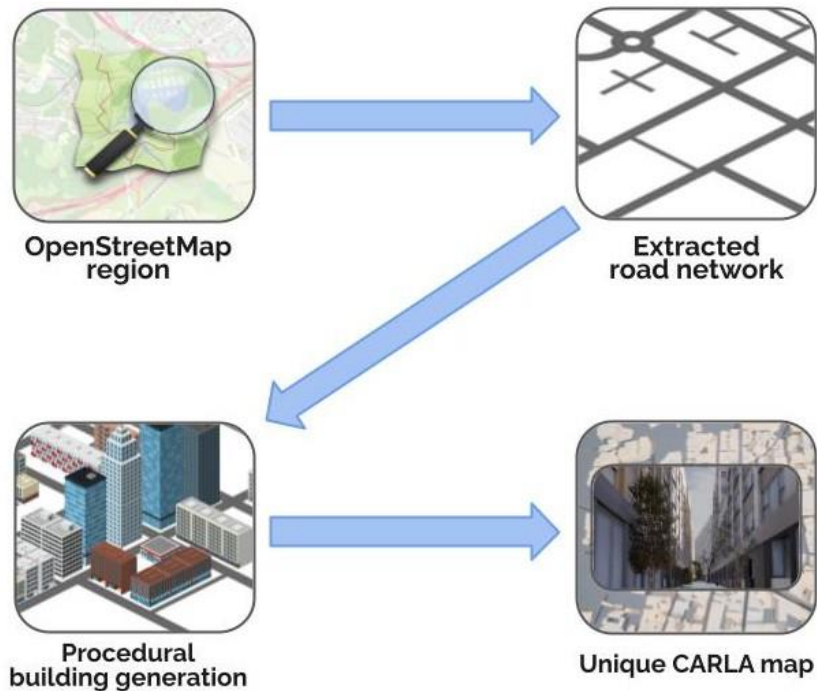

Safe, controlled  
environment

Iterative variable  
manipulation for testing

# Simulation contd.

Replicate **real-world** infrastructure

Answer "**What if...?**" questions

Digital twin from **road network**

**THANK YOU!**
